Synopsys at DAC 2014

Visit Synopsys at Booth #1133 to learn more about the newest technologies available to help accelerate innovation in the electronic design industry. Synopsys will offer demonstrations of its custom implementation, Design Compiler® solution, PrimeTime® tool, static/formal verification, DesignWare® IP and the recently introduced IC Compiler II™ product, Verification Compiler™ platform and ZeBu® Server-3 emulator. Also find out more about how Synopsys' Coverity® software development and testing products are improving software quality as well as reducing the risk of security breaches and catastrophic failures that plague many of today's large software systems.

You can visit Synopsys in the ARM Connected Community Pavilion, booth #2001.

Synopsys will also be highlighted on the DAC floor at many of its other partners' booths.

Be sure to check out Synopsys' participation in the new DAC Automotive Village to learn about the newest advancements in automotive electronics design.
