# Synopsys to Showcase its Software Integrity Platform at GovWare 2017 in Singapore

SINGAPORE, Sept. 11, 2017 /PRNewswire/ -- Synopsys, Inc. (Nasdaq: SNPS) today announced it will showcase its Software Integrity Platform at GovernmentWare 2017 (GovWare) in Singapore from September 19 to 21, 2017. GovWare is one of the most established conferences in cybersecurity, where government officials, technology experts, and industry visionaries and professionals converge to discuss the latest trends, issues and technologies in cybersecurity. Joe Jarzombek, global manager of software supply chain solutions at Synopsys will speak at the conference on "Software Supply Chain Management: Reducing Attack Vectors and Enabling DevSecOps".

## Synopsys' GovWare 2017 Conference Session (Room MR 324, Level 3)

What: Emerging Security Technology Track

Topic: Software Supply Chain Management: Reducing Attack Vectors and Enabling DevSecOps

When: Wednesday, September 20

Time: 14:40 - 15:20

## Visit Synopsys at GovWare 2017, Booth J23, Level 4

Join Synopsys' Software Integrity Group at Booth J23, Level 4, Suntec Singapore Convention and Exhibition Centre, Singapore 039593, from September 19 to 21, 2017, to learn about the products and services that enable organizations to detect and remediate defects, vulnerabilities and compliance issues throughout the Software Development Lifecycle (SDLC). Register as a public sector, private sector, or foreign visitor at https://www.sicw.sg/register.html. For more details on the conference and exhibition, visit https://www.sicw.sg.

## **About the Synopsys Software Integrity Platform**

Synopsys offers the most comprehensive solution for building integrity —security and quality— into the software development lifecycle and supply chain. The Software Integrity Platform unites leading testing technologies, automated analysis, and experts to create a robust portfolio of products and services. This portfolio enables companies to develop personalized programs for detecting and remediating defects and vulnerabilities early in the development process, minimizing risk and maximizing productivity. Synopsys, a recognized leader in Application Security Testing (AST), is uniquely positioned to adapt and apply best practices to new technologies and trends such as IoT, DevOps, CI/CD, and the Cloud. For more information, go to www.synopsys.com/software.

## **About Synopsys**

Synopsys, Inc. (Nasdaq: SNPS) is the Silicon to Software <sup>™</sup> partner for innovative companies developing the electronic products and software applications we rely on every day. As the world's 15th largest software company, Synopsys has a long history of being a global leader in electronic design automation (EDA) and semiconductor IP and is also growing its leadership in software security and quality solutions. Whether you're a system-on-chip (SoC) designer creating advanced semiconductors, or a software developer writing applications that require the highest security and quality, Synopsys has the solutions needed to deliver innovative, high-quality, secure products.
